

1. Is the Python Standard Library included with PyInputPlus?

Sol. No

2. Why is PyInputPlus often imported as pyip with import pyinputplus?

Sol. General notation

3. How do you distinguish between inputInt() and inputFloat()?

Sol. InputInt() take input as integer.

InputFloat() takes input as floating point.

4. Using PyInputPlus, how do you ensure that the user enters a whole number between 0 and 99?

Sol. Import pyinputplus as pyip

```
inp=pyip.inputInt(prompt="enter a number btwn 0 to 99" , min=0 , less than=100)
```

```
Print(inp)
```

5. What is transferred to the keyword arguments allowRegexes and blockRegexes?

Sol. AllowRegex: We can set a list of regex strings to the allowRegexes parameter to allow only that input.

BlockRegex: We can set a list of regex strings to the blockRegexes parameter to block that input

6. If a blank input is entered three times, what does inputStr(limit=3) do?

Sol. Limitortimeout exception

7. If blank input is entered three times, what does inputStr(limit=3, default='hello') do?

Sol: take input as Hello
